1 Introduction

1.1 Purpose

The purpose is to test the web application in a right way using the test cases mentioned below.

1.2 Scope

Highlighting the functionalities that the user experience through out his/her visit to our web application and defines the steps of interacting with each functionality and how to use them .

2 Test Scenario X

Test Scenario 1:Entering credentials Functionality
The user start to sign up if he/she doesn't already have an account by entering his/her email and password and confirming password .

Test Scenario 2: Entering credentials Functionality
The user starts to enter his/her credentials such as email or password if already have an account.

Test Scenario 3: Check the Product Search Functionality
The user here starts to explore our menu so he/she can determine his/her choice of coffee .

Test scenario 4:Adding the product into cart and checking out.
In this step the user adds the product to his cart by clicking on the button Add to Cart and then after he/she finishes shopping they can check out by clicking the button purchase in the cart page .
